Contact this area Featherlite dealer for details:

ALUMINUM vs. STEEL

Before deciding, **you should know...**

- A true "all aluminum" trailer has BOTH an aluminum substructure and aluminum skin (sides). NOTE: Aluminum skin with painted or electrogalvanized steel frame is NOT an aluminum trailer and is vulnerable to rust, corrosion and more rapid depreciation.
- Because of their superior durability, an all aluminum Featherlite trailer **can last a lifetime** with routine maintenance.
- Steel trailers are heavier than all-aluminum trailers. Many trailer owners, who have owned both steel and aluminum trailers, report that towing an all-aluminum Featherlite leads to a **significant fuel savings**.

PerfectFit[®] SYSTEM
